a ourselves or that. in response to “b is for bipolar” i’d like to remind the individual
therefore, alcohol goes directly to the baby, which might result in impaired mental and motor development, changes in sleep patterns, and growth deficits
however, there are some exceptions, so you should always check with your doctor about whether the patch will be affected by certain prescription or non-prescription medicines
i do not advocate violence against the government, but there will come a time when enough is enough
psychic warnings are given for a reason and i believe we should all heed them, and rather be safe than be sorry.
